

PRESS RELEASE

20 November 2007

CML MICROSYSTEMS Plc

INTERIM RESULTS

CML Microsystems Plc ("CML"), which designs, manufactures and markets a broad range of integrated circuits, primarily for global communication and data storage markets, announces its Interim Results for the half year ended 30 September 2007. CML has operations in the UK, Germany, the US, Singapore, China and Taiwan.

Commenting on the results, George Gurry, Chairman said:

"The results for the six-month trading period ending 30 September 2007 show a loss somewhat greater than earlier internal expectations and reflect the further effects of the operational problems that impacted heavily on the previous year's trading performance.

"They nevertheless mark an expected material improvement over the results for the immediately preceding six months and are an indication of progress taking place at the group operating level."

Financial Highlights

- Turnover down 11% to £8.49m (2006: £9.46m)
- Loss before tax of £1.1m (2006: Loss of £0.83m)
- Loss per share of 8.05p (2006: Loss of 4.90p)
- Cash in bank and at hand of £1.8m

Business Review

- New product releases within the storage and wireless market segments.
- Adoption of voice privacy Integrated Circuits made a notable contribution.
- Storage segment benefited from an increase of product shipments into the Americas.
- New customer design wins expected to contribute meaningful revenues in the next calendar year.
- Sale of Group products into the telecom segment continued to be volatile.
- Significant investment to ensure the Group is well placed to reap future benefits.

Regarding prospects, George Gurry, Chairman said:

"The remainder of this current trading year will continue to be challenging, but your Board remains confident, subject to unforeseen circumstances, that the Group's return to profitability will become evident shortly thereafter."
