

PRESS RELEASE

22 November 2005

CML MICROSYSTEMS Plc

INTERIM RESULTS

CML Microsystems Plc ("CML"), which designs, manufactures and markets a broad range of semiconductor products, primarily for the global communications market, announces its Interim Results for the six months ending 30 September 2005.

CML's semiconductor solutions serve customers in the wire-line telecom, wireless data, two-way radio, memory card controller and programmable platform markets. Operations are in the UK, Germany, the US, Singapore, China and Taiwan.

Commenting on the results, George Gurry, Chairman said:

"It is pleasing to report that your company has continued to achieve the firm progress in product sales that I had expected as the opening period began, led strongly by the healthy growth maintained in sales for memory card controllers."

Financial Highlights

- Turnover up 24.5% to £14.240m (H1 '04: £11.440m)
- Pre-tax profit up 4.7% to £1.416m (H1 '04: £1.352m)
- Earnings per share up 17.6% to 7.83p (H1 '04: 6.66p)
- Cash reserves remain at a satisfactory level
- Introduction of IFRS

Business Review

- Good gains in sales of Memory Controller products
- Increased product development expenditure to increase range and scope of new products for Hyperstone
- Sales of Radio and Wireless Data applications ahead over comparative period
- Sales of Wireline Telecom products into China remains weak
- Products to market for marine communications and multi-standards land mobile voice and data markets
- R&D expenditure to rise in H2 - strong new product portfolio underpins growth strategy

Regarding prospects, George Gurry, Chairman said:

"Although I expect the weaknesses that have persisted in some historic market areas will continue to present difficulties through the months ahead, I feel quite sure that your company will continue to achieve its growth objectives."
